The Lifts for Life Guarantee

Fixed Price — No Surprises

We provide a fixed-price quote, so you know exactly what your lift will cost before we begin. No hidden extras. No unexpected add-ons.

Our Expert Team

Every lift is installed by our own trained employees — specialists in Kalea lifts — ensuring the highest standards and complete accountability.

Clear & Consistent Communication

From your first consultation to the final handover, we keep you updated every step of the way. You'll always know what's happening and when.

Uncompromising Quality

Your lift will be installed with precision and care, using the highest quality materials and workmanship, so it performs beautifully for years to come.

Multi-Level Living Specialists

We focus solely on residential lifts, giving you the benefit of deep expertise and tailored solutions for your home or project

At Lifts for Life, we believe your home should be as effortless as it is beautiful. Our premium lifts are designed to make multi-level living safe, seamless, and future-proof, so you can enjoy every level of your home with confidence. Backed by world-class products, quality you can trust for years to come, and a team that truly cares, we're here to elevate both your lifestyle and your space.

— Fiona Wilkinson, CEO, Lifts for Life

Discover the world of bespoke lift solutions, crafted to perfectly complement your home or project. At Lifts for Life, we've partnered with Kalea, a global lift manufacturer with a heritage dating back to 1898.

For over a century, Kalea has refined lift design, combining innovation, flexibility and proven engineering to create solutions that elevate both space and lifestyle.

Kalea's lifts combine high-end design and engineering with exceptional value, making premium lift solutions accessible for homeowners.

Highly customisable and locally supported, each lift is designed with the Australian home in mind to ensure a perfect fit for both new builds and existing homes. Depending on the model, lifts are manufactured in Kalea's world-class factories in Sweden or China, with each adhering to the highest international standards.

This partnership allows us to offer refined, customisable residential lifts backed by global engineering and delivered with local expertise.

Why work with Lifts for Life

Premium. Modern. Bespoke.

Our mission is simple: to make moving through your home effortless, safe, and beautiful. At Lifts for Life, we don't simply install lifts — we design vertical living solutions that enhance your home, lifestyle and independence. Since 2013, we've specialised in residential lifts across NSW and the ACT. Every project balances performance, safety, needs, building integration and cost.

Family-run. Boutique. Trusted.

As a family-owned business, we treat every home with care and accountability. Hundreds of homeowners trust us to deliver lifts that move smoothly, look stunning, and fit perfectly into their lifestyle. Our reputation is built on reliability, integrity, and genuine care for our clients.

Fully personalised. Always in-house.

From initial concept to final installation, every step is managed by our in-house team. No outsourcing. No compromises. Our expert designers, technicians, and installers work closely with you—and your architect or builder—to ensure your lift integrates flawlessly into your home's architecture and aesthetic.

Exclusive. Customisable. Timeless.

Our lifts are engineered and designed for both new builds and existing homes, offering elegant vertical transport that enhances accessibility and adds long-term value. With a wide range of finishes, materials, and bespoke options, every lift becomes a statement of style and individuality—designed around your home and your lifestyle.

Cutting-edge technology. Inspired design.

Each Lifts for Life elevator blends advanced engineering with elegant design, ensuring smooth, reliable operation and a striking visual presence. It's more than a lift—it's an experience, a home upgrade, and a lasting investment.

At Lifts for Life we don't just move you—we elevate your home, your lifestyle, and your everyday living.

Primo

Budget friendly access

2 stop from \$45,000

SOLID MODULAR

GLASS MODULAR

Benefits

When access is a priority but budget is equally important

Enjoy user-friendly access throughout the home – no more struggles with stairs, and easy movement for family, visitors, or carers

Use more of your home comfortably

Get the lift installed quickly and with less disruption

Save on construction and renovation costs due to minimal building work

Maximise usable space – because ~70% of the lift's footprint is actual passenger area

Energy-efficient operation – the lift runs smoothly & uses little power

Suitable for indoor and outdoor installation

Feel safer and more independent – with safety features like emergency stop, safety edges, emergency phone / lowering, and adherence to European & Australian safety standards

Adds value and broad appeal to your property – having an accessible, basic lift³

Features

Doors on up to 3 sides

Simple to operate

Includes own shaft – can be glass, steel or a mixture of panels

Limited customisation options

Several sizes to choose – from 1 person to wheelchair & carer

SB200

Budget friendly access

2 stop from \$45,000

GLASS OR SOLID PLATFORM LIFT

Benefits

Adds practical value and broader appeal to your property, by improving accessibility without overcapitalising

Ideal for wheelchair users, family members, and carers

Get the lift installed quickly with minimal disruption to your home

Reduce construction and renovation costs thanks to a self-contained shaft and minimal structural requirements

Enjoy simple, reliable access throughout the home

Use your home comfortably without relying on stairs

Suitable for indoor or outdoor installation

Features

Doors on up to 3 sides

Simple to operate

Includes own shaft – can be glass, steel or a mixture of panels

Limited customisation options

3 sizes to choose from

“From day one that we had the lift installed this company has been brilliant. Being in a wheelchair and so reliant on the lift every day I am so grateful. Thank you sincerely Lifts for Life.”

Phil & Paula Smith

“It works so very well, looks wonderful and has already made a positive change to our lives.”

Roger & Annabelle Pegrum

“Both Terry and Anne are over the moon with [the lift] and asked me to pass on their thanks to you and the team for a job well done. I am very impressed as well with the lift installation and associated works, it looks like it was designed to be there all along. Extremely functional and very unobtrusive in the home.”

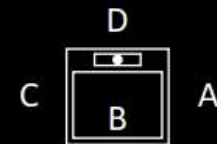

Phil Evans, iCare Building Supervisor

“Our University has many historical buildings which were not designed for entry by the disabled. The lift is very mobile, easy to position, easy to operate and flexible. Operators need minimum training and the device is low in maintenance time and cost. We have used the lift in garden areas where electrical sources are non-existent.”

Bill Bohn, Project Manager

How to understand the numbers

B & D are parallel to the screw and motor

CAR SIZE is the standing space inside the lift

SHAFT SIZE is the final size of the installed shaft

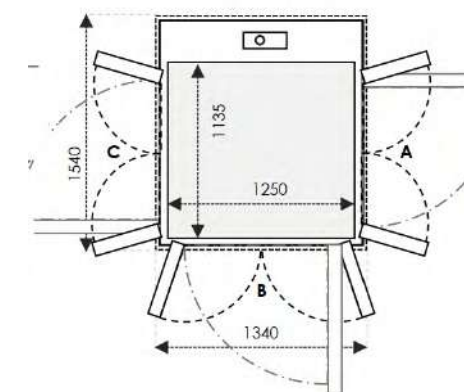

CUT OUT SIZE is the space needed to install the lift

European Safety Standards

We believe safety is paramount, and that is why every single one of our lifts is carefully designed to respect the strictest of European standards - and most importantly the EN 81-41 machine directive. All of our lifts, regardless of design or model offer the same level of unparalleled safety.

We never compromise on safety.

24/7 Service Nationwide

We believe in the value of local. Beyond our 24/7 hotline, we keep an ample local supply of spare parts and have technicians on call around the country in case of emergencies.

In fact, we are so determined to be there for you in case of emergencies that we check if your elevator phone is active every day through a discrete ping and alert you if it's not.

Anti-trap System for Emergencies

As a home lift company, safety is our main concern.

This is why our lifts come equipped with an anti-trap system consisting of a battery-powered emergency lowering system in case of blackouts, a reset button, emergency manual openings and for our generation 4 lifts, a manual lowering directly from the pit!

We have you covered.

Safety-focused In-depth maintenances

Our maintenances are thorough and complex. Rather than a simple check, we make sure that every single safety function including sensors, emergency stops, brakes and more is 100% operational.

More than simply extending the lifetime of your lift, our maintenances are a key part of our safety promise.

Process

Here's a simple step-by-step guide to show you exactly what to expect as we bring your beautiful new custom made lift to life. From your first consultation to final handover, we've got you covered — and we'll be with you every step of the way

Week 0 Let's Get Started!

One of our friendly Lift Consultants will visit your home to explore your vision and assess your space.

Together, we'll choose the perfect lift model and create a custom design just for you. We will even show it to you in a 3D render.

You'll receive a clear pricing proposal, and we'll talk through what parts of the project are covered by Lifts for Life and what falls under "Works by Others."

Once you're happy, just digitally sign the proposal and we're on our way!

Week 1 Lock It In

You choose the size and pricing — exciting!

A \$1,800 design fee secures your pricing for 30 days.

We'll send your official Order Confirmation, and your consultant will guide you through everything.

Week 2 Time to Build

With the signed Order Confirmation in hand, a 60% payment is made.

Your custom lift is officially ordered and enters production. It's happening!

Week 3-14 Behind the Scenes

Your lift is being built to your exact specs — crafted with care and precision.

During this time, your builder prepares the site following our easy-to-follow Site Prep Guide.

Need help or a site check? No problem — our Construction Manager is just a call away!

Our Production Manager is now your go-to person for all things manufacturing and delivery! They'll keep you updated and make sure everything stays on track.

Week 19 Ready for Lift-Off

It's almost time! A 20% manufacturing completion payment is made to get your lift ready for international shipping. We'll schedule a final site check to make sure everything is perfectly prepared. Once your consultant gives the thumbs-up, we move to the next phase!

Week 20 Lock in the Install Date

A 15% install payment is due before we deliver your lift to site.

Once we've received payment and your site is ready, we'll book in your installation date. Not quite ready? No worries — we offer up to 12 weeks of free storage (extra fees apply after this).

Week 21-22 Installation Time

The big moment arrives — your lift is delivered, and installation begins!

Our expert team of technicians will install and test your lift with care and precision. By the end, your lift is fully installed and ready for handover.

Week 21-22 Handover & Celebration

It's time to celebrate — your lift is complete!

A final 5% payment is due after we commission and officially hand over your lift. Warranty starts from the install date.

Not ready to use the lift right away? That's okay — we'll help you maintain it to protect your investment.

A few helpful tips

- ✓ "Works by Others" includes anything like shaft construction, electrical work, or other building tasks outside the lift supply.
- ✓ Your lift consultant is here to help from start to finish — ask them anything!
- ✓ Staying on schedule with payments keeps your project running smoothly.
