

KALEA LUNA

Built for New Beginnings

A New Generation of Platform Lifts

Built for Life.

We want to make lifts that accompany you on every step of your life's journey, offering you the freedom and comfort you need, today and tomorrow. More resource-efficient and energy-efficient than ever, our new line of lifts has a timeless design with a futuristic edge that is easy to customise and upgrade, enabling you to make meaningful choices that will benefit both you and the planet.

Kalea Luna. Built for New Beginnings.

Every now and then, it is time for a new beginning. Maybe you are starting a new project, building a new home, updating your interior design, or entering a new stage in life. It really does not matter. Whatever new direction your life is taking, the Kalea Luna is built to last and to accompany your dreams.

Elegant, ergonomic, and easy to upgrade over time, the Kalea Luna is designed to make your dreams of freedom and comfort come true.

Beautiful Inside and Out

The Kalea Luna is part of our latest generation of space-saving and sustainable lifts. Energy-efficient, elegant, and ergonomic, this is a beautiful lift, inside and out. Resource-efficient to make, energy-efficient to operate and easy to modernise over time, the Kalea Luna is a great choice for you and for the planet.

Green (RAL 7033)

– A soft shade of sage that exudes natural harmony and serenity.

Designed for Your Peace of Mind

*Discover smart and flexible lift design that
will adapt to any style, space, and stage in life.
Discover the magic of new beginnings.*

A New Generation of Lifts

Part of our brand-new generation of lifts, the Kalea Luna is our most resource-efficient lift model ever, not only in terms of the manufacturing process but also in terms of energy efficiency and product lifetime.

Lift Technology Built to Last

Even though our lifts are built to last, they will need to be upgraded and modernised over time. Thanks to the smart and adaptable construction of our new generation of lifts, it is easier than ever to keep your lift updated. In fact, most elements and features of the Kalea Luna can be added or replaced with just a few hours of work or less. Cost-efficient for you and great for the planet.

Green & Silent Comfort

For your peace of mind and comfort, the Kalea Luna is equipped with our new, upgraded drive system as standard. Optimised to minimise friction, energy loss and sound, the new drive system allows your lift to carry **Energy Label A** and makes lift operation smoother and quieter than ever. In fact, only a few metres from the lift, the sound generated is **less than 40 dB**, making the Kalea Luna the perfect choice for libraries, study halls and bedrooms.

Unique Ergonomic Design

The control panel of the Kalea Luna is equipped with LED lights as standard and offers you an elegant and ergonomic design with a futuristic edge. The floor buttons react to both top and frontal pressure, making hold-to-run operation* natural and easy. The level indicator is another cool feature with an intuitive design that simply lights up under the button of the floor you have reached.

*We learn
from our past
to innovate
for the future*

* According to European Standards, platform controls need to be hold-to-run (constant pressure on the button), while landing controls have automatic drive. For countries outside of Europe, other standards may apply. Please contact Kalea for more information.

Ready-made Lift Concept – Kalea Luna

While conventional lifts take months to make and weeks to install, the Kalea Luna can be delivered in weeks and installed in just a few days, without major construction work. The secret lies in our space-saving, ready-made lift concept, which both minimises the structural impact on your building and the interruption of your daily life.

Reduced Top Height

The top height of only 2350 mm fits under most ceilings.

Smart Screw-driven Technology

Robust, reliable and 100% electric screw and nut drive with automatic lubrication system.

Elegant Aluminium Doors

For your comfort, the panoramic lift doors are made of lightweight and strong aluminium.

Machine Room Less Lift

The lift machinery fits inside the shaft, no need for a separate machine room.

Unique Panoramic Lift Shaft

Thanks to its slender glass panel frames, the unique, panoramic lift shaft offers you maximum light transmission and transparency.

No Need for a Lift Pit

The lift can be installed directly on the floor, with our elegant access ramp, or with a shallow pit of just 5 cm.

Luxury is our New Standard

To celebrate the launch of our completely new generation of lifts, we introduce several cool new standard features.

Full Transparency

The panoramic lift shaft and doors are standard for the Kalea Luna. Designed for maximum transparency and light transmission, the glazing offers you a spectacular 360° view.

360°

Panoramic Plus Door

The Panoramic Plus door is the standard door model for the Kalea Luna. The door always includes slim and elegantly shaped door handle and an ergonomic call button with back light.

Recessed Ceiling

The centre of the ceiling of the Kalea Luna is slightly recessed and framed by energy-saving LED light to create a soft and subtle halo effect that is restful and pleasing to the eye.

Cool & Functional Light Features

The LED lights of the control panel and floor safety edges look cool and modern, while the top safety bar lights up in red to alert you if you accidentally lean on it.

Lifts that Adapt to Your Dreams

To give you the freedom to create the perfect lift design for your home or building project, the Kalea Luna is available in a wide range of lift sizes and offers many installation options.

Choose between 20 Lift Sizes

The Kalea Luna offers you the widest range of lift sizes in the market to fit any needs and space. In fact, you have the choice between 20 platform sizes, where the smallest size fits inside the space of a wardrobe, and the biggest sizes are large enough to transport wheelchairs and groups of up to 5 people. This enables the Kalea Luna to adapt to the requirements to public, private, and commercial settings.

Shaft Designs for any Room

The Kalea Luna is delivered with a ready-made glazed shaft as standard but is also available with a shaft in steel panels. A steel shaft is a great choice if you want to install the lift inside an existing or site-built masonry shaft, while a fully glazed lift shaft often is the perfect choice for the centre of a staircase. It is also possible to freely combine glass and steel panels, on all sides of the lift shaft.

If You Have Low Ceilings

Our standard doors can be customised to fit under low ceilings. For the top floor, we also provide 1,3-metre-high gates, perfect for very low or slanted ceilings.

For more technical details and information, please download the Technical Brochure for the Kalea Luna from our website www.kalealifts.com/tools-docs/downloads.

Beautiful Standard Collection

Our product designers have composed a collection of 7 stunning colours ranging from subtle, neutral tones to rich and vibrant shades. Each colour is combined with a carefully selected floor, offering you 7 beautifully balanced designs to choose from. In addition, you always have the option of composing your own bespoke design with the 250+ RAL and premium colours available in our global collection.

Signal White
(RAL 9003)

Award-winning Floors

Inspired by the texture of natural stone, the award-winning Marmoleum Slate collection by Forbo has an embossed surface that offers playful variation and great slip resistance. Even though each lift colour comes with a preselected floor, you are free to choose any of the other Marmoleum Slate floors in our collection or fit your own customised flooring.

Highland Black

Door Collection

All door models in our new collection are made of strong and lightweight aluminium and are easy to change and upgrade over time. We offer you the choice between classic single-hinged doors and gates and innovative, double-hinged saloon doors. The Panoramic door is also available with a long external door handle.

Our Latest Door Innovation

The saloon door is our latest innovation and has a light and airy design to match the panoramic shaft. The door model includes concealed automatic door openers as standard and saves a lot of space on every landing, given that two small door leaves require less room to open and close than one big door leaf.

Door Accessories

Our collection of doors offers you a wide range of attractive and practical accessories, such as the selection shown below. In addition, we provide concealed automatic door openers and door-open-holders, as well as lock systems. Contact your Kalea dealer for more information.

Level Indicators

Level indicators show you when the lift has arrived and indicate travel direction.

Child Safety Lock

The child lock efficiently stops young children from using the lift unsupervised.

Landing Lights

The landing lights both light your way at entry and exit and announce lift arrival.

Graphite Black (RAL 9011)

– Black always makes a strong and absolutely timeless statement.

Innovative Lighting

We have invented a range of exquisitely designed lighting options to really make your Kalea Luna shine. All lighting options are designed with durable and energy-efficient LED technology and programmed to automatically switch off when the lift is not used.

Ceiling with LED Light Diodes

The ceiling with LED light diodes has a simple and classic design offering soft and subtle lighting.

LED Lit Shield Wall

The LED lit shield wall is a great choice if you want to add a cool and futuristic lighting effect to your lift.

Recessed Ceiling with Light Diodes

The combination of recessed light and light diodes enhances the light and is ideal for public and commercial settings.

All Kalea lift models carry the CE mark and go through extensive testing and quality checks before leaving our factory. Our lifts are certified products that comply with European Safety Standard Machinery Directive 2006/42/EC. The brand Kalea Lifts is owned by Cibes Lift Group AB ©. For more product details and information about the product and accessory selection, contact Kalea Lifts. THIS IS KALEA

Kalea was created in 1898 in Gothenburg, Sweden, and is one of the oldest lift brands still in existence. In 2008, Kalea became a member of Cibes Lift Group, one of the world's largest manufacturers of space-saving, modular lifts. All lifts are manufactured in our factory in Gävle, Sweden, and distributed to more than 70 countries via a network of 200 certified dealers.
