

THE UNIVERSAL LIFT
KALEA® A4 MILLE GOODS, PASSENGER
& STRETCHER LIFT

MAGIC MODULARITY

Thanks to our space-saving, modular concept, the manufacturing and installation time of Kalea lift solutions is much shorter than for conventional lifts. Even high-capacity lifts, like the Kalea A4 Mille, are delivered and installed much faster, and at a fraction of the cost.

1898
SINCE

Kalea was founded in 1898 and is one of the oldest lift brands still in existence. Let our experience guide you to the perfect lift solution!

POWERFUL & POLYVALENT

The Kalea A4 Mille has a rated load of 1000 kg and is approved for transportation of goods and people. This makes the Kalea A4 Mille a great lift solution for both accessibility and goods, suitable for a wide range of commercial establishments, such as warehouses, offices and restaurants and department stores, but also for carehomes and public buildings such as schools and museums.

All images of lifts and colour samples in this brochure are for inspirational purposes only. For critical colour matches, we advise you to use physical colour or material samples.

ADD VALUE TO YOUR BUSINESS

Given that the Kalea A4 Mille works just as well as an accessibility solution as it does as a transport solution for stretchers, hospital beds and goods, this platform lift has the potential to add great value to your business.

In addition, the small footprint, low top height and reduced lift pit of only 130 mm, makes the Kalea A4 Mille exceptionally fast and easy to install.

SMART USE OF YOUR SPACE

One of the great advantages of our platform lifts, is their efficient use of space. The platform constitutes almost 70% of the total footprint, which makes it possible to fit the Kalea A4 Mille in a much smaller space than other comparable lifts would require.

The large platform and extra-wide doors enable the Kalea A4 Mille to transport bulky goods, such as large pallets, big roll containers or even pallet trucks.

Thanks to the wide choice of different floor, glazing and colour options, the design of the Kalea A4 Mille can be adapted to blend in seamlessly with most architectural and decorative styles.

ROBUST & RELIABLE ELEGANCE

OPTIONS

To make the lift even more resistant, the Kalea A4 Mille can be upgraded with raised edges on the platform, kick plates in stainless steel for the doors and hard-wearing aluminium chequer plate flooring.

To enhance accessibility it is possible to equip the Kalea A4 Mille with automatic door openers and large, remote call buttons, also known as elbow buttons.

KALEA® A4 MILLE

While conventional lifts take weeks to install and require major construction work, the Kalea A4 Mille can be installed in less than a week and require only minimal refurbishment. Our secret is our modular concept, which minimises the impact on your building and shortens the installation time.

Modular lift shaft

No need for a masonry shaft, a ready-made lift shaft of glass or steel panels is always included.

Reduced lift pit

A shallow lift pit of 130 mm is enough.

Top height

The 2300 mm top height fits easily under most ceilings.

Energy-saving LED technology

The ceiling and platform are illuminated by durable and energy-saving LED lights.

Screw-driven system

Reliable 100% electric screw-driven system, no hydraulics.

Machine room less

The machinery fits inside the shaft, no need for a separate machine room.

Customisable platform design

The platform design can be customised with different colours and floor options.

ACCESS CONFIGURATIONS

1. Single entry

2. Adjacent

3. Open-through

STANDARDS AND CERTIFICATES

Energy Certificate: B according to VDI 4707.

The Kalea A4 Mille is a CE type certified product and complies with the Machinery Directive 2006/42/EC and applicable parts of EN 81-41.

The control system of the Kalea A4 Mille attains Safety Integrity Level 3 (SIL3).

BUYING A LIFT STEP BY STEP GUIDE

Professional Advice

You can always book a free consultation with your local Kalea dealer to get advice on how to create the best lift configuration for your project.

Design your lift

You have the freedom to create a lift design that blends in with any building. The lift is available with a ready-made shaft in steel or glass (3 sides) and offers you a wide range of colour and floor options.

Order & quotation

Your Kalea dealer will provide you with a quotation and lift drawings. The price of the lift will depend on your choice of lift configuration. As soon as you have approved the specification and drawings, your Kalea dealer will order the lift from our factory.

Delivery & installation

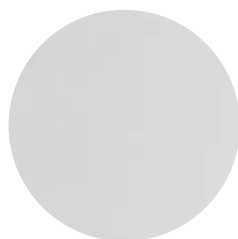

Your Kalea dealer will take care of the logistics, you just need to agree on the installation date. All our lifts are made in Sweden and the manufacturing time is generally between 8-10 weeks.

The Kalea Commitment

Your lift undergoes extensive testing and quality checks before leaving our factory and comes with a manufacturer warranty. Our strict environmental policy takes the full lifecycle of your lift into account; from sourcing and manufacturing to energy consumption and recycling.
